This Double-Sided Horizontal Cable Management Panel is an ideal solution for managing cables within a rack or cabinet in a wide variety of applications. This panel is designed to mount on any 19in EIA style rack or cabinet and features a unique finger design that protects cables from damage while the front and rear covers mount with six hinge clips to allow the door to be opened one handed without becoming unhinged. The fingers are removable allowing easy access for lacing and terminating patch panels and they begin 3/4in from the face of rack to provide bend limitation for cables to protects cables, equipment and network performance. This panel includes four #12-24 equipment mounting screws so there are no additional parts to order. The optional white thermoplastic plugs block airflow and can be easy pierced for cable access.

Features & Benefits
