

The Smart 2-Port USB Car Charger is an ideal solution for charging mobile devices while on long road trips or short commutes. This high-performance car charger features a compact design for easy portability and provides a power output of 5V and 2.4A for device charging.

The charger includes two USB-A ports to charge two devices at once. The Smart-IC technology identifies the mobile device's unique charging requirements to safely charge at the maximum speed. Having the ability to detect the accurate current output allows for protection against overloads, which can damage valuable mobile devices.

5 volts and 2.4 amps of power are available for device charging from this adapter when it is plugged into a DC outlet. The 2.4 amps are shared by the two ports. The power output makes this adapter the perfect solution for charging smartphones and tablets.

Features & Benefits

Two USB-A female ports	5V, 2.4A maximum total output
Smart-IC technology auto detects output requirements	Accurate limited current output and overload protection
Internal temperature protection	Fireproof shell material
Blue LED indicator when powered	

Specifications

General Info

Product Line	C2G	Color	Black
UPC Number	757120210702	Country Of Origin	China
Features	USB-A Charging	Application Sector	Commercial, Residential
Warranty Type	Lifetime	Type	Adapter
