

Quickly becoming the standard in satellite and cable television installation, our compression connectors provide reliable connections with a high resistance to moisture. High frequency, these are compatible with digital cable and satellite. The bright nickel finish withstands harsh environments, and reduces the effects of oxidation.

An o-ring in the nut and a tapered plastic ferrule provide a barrier to moisture migration through the threads and under the cable jacket that would otherwise damage the cable. Use item #38011, our 3-in-1 compression tool, for easy installation.

Features & Benefits

Provides a reliable connection which is resistant to moisture

Compatible with digital cable and satellite signals

Designed for use with quad shield RG6 cable

Specifications

General Info

Product Line	C2G	UPC Number	757120410751
Country Of Origin	Taiwan, Province Of China	Application Sector	Commercial, Residential
