

C2G

HDMI® Inline Extender Decorative Wall Plate with Interchangeable Wall Plate Covers - 4K 60Hz (TAA Compliant) Part No. CG-C2G42395

Supports 4K 60Hz resolution for more vivid and detailed viewing

Yes

PVC (Polyvinyl Chloride)

HDMI Male

The HDMI Inline Signal Booster Decorative Wall Plate is an excellent choice for transitioning to in-wall cabling, concealing and extending 4K HDMI behind the wall instead of running cables across the floor – perfect for home offices, conference rooms, huddle spaces, and classrooms.

Appearance matters, and the clean, professional-looking installation of this wall plate will complement any environment. The four included interchangeable wall plate covers come in white, black, beige, and brushed aluminum to match the decor of any installation.

This HDMI inline extender includes a thin, flexible HDMI pigtail that accommodates the tight bend radius required for installations within a standard junction box. With three different power options, you can choose from HDMI power supplied through the signal connection, the USB Micro B port on the front, or the power jack on the backside, offering versatility for any installation.

Wall plate form factor for a clean, professional look

1080p, 4K, 4K 30Hz, 4K 60Hz

HDMI Female
