

The Overhead Cable Pathway Rack simplifies above rack cable management with an easy-to-install rack system that adds additional RU space without taking up additional floor space. The overhead racks are perfect for tech refresh designs in data centers and small data rooms, as well as large new installs.

[B]Convenience[/B]

The overhead rack is designed to easily install in Cablofil or other wire-mesh tray, tubular runway, or suspended from threaded rod. The unique design allows for any number of mounting locations and directions, so there is no limit to its uses.

[B]Durability[/B]

Made from a welded steel frame, it is rugged and ready to install right out of the box. Pathway racks are bonded throughout and have universal ground locations, while supporting up to 65 lbs in all variations.
